

Hand Hygiene Monitoring System (HHMS)

Measurably improving hand hygiene.

HHMS enables users to get **data-driven** insights on hand hygiene behavior.

With this data, hygiene experts can identify and fix weak points in dispenser infrastructure and provide staff with automatic hand hygiene behavior feedback.

Ensure exceptional hand hygiene with HHMS's data driven insights...

**Exact
Date**

**Dispenser
Location**

**Volume
Dispensed**

**Filling
Level**

**Battery
Level**

Some of the **benefits** that you will see when utilizing HHMS in your facility are:

- **Robust task management** system for both Environmental Services and Infection Prevention
- **Downloadable reports** for hand hygiene compliance
- Alerts when fill level and batteries are low
- Reporting with heatmaps on dispenser status and utilization
- **750 ml and 1250 ml** sizes are available based on organization usage needs
- Free-standing and wall-mounted functionality
- A **touchless dispenser** that promotes infection prevention
- **26%** fewer days with antibiotic treatment in hospitals
- **28%** fewer HAIs contracted by receiving treatment in a hospital
- A **31%** increase in hand sanitizer use by hospital staff
- A **high ROI** technology to **prevent infections**
- **Recyclable materials** to prevent excess waste

3

Varidyn provides environmental infection control solutions that are driven by the newest technologies.

Our solutions are for the most challenging circumstances in healthcare and are designed to equally drive effectiveness, efficiency and a high ROI.

To reimagine environmental infection control by leading the transformation through research, innovation and technology and build lasting relationships within the healthcare community that deliver the highest level of care to patients and staff.
